SUMMARY

Enterprise AE selling cloud and AI platforms into Australian education, preceded by fifteen years as an education leader. Five years' field closing experience across mid-market and enterprise, with 100% median quota attainment against a team median below 50% and 140% new logo attainment. Builds pipeline independently: created an entire ANZ K-12 market for Salesforce from a standing start, convening the buying community, shaping the tenders that followed, and generating \$3M+ in pipeline where no territory previously existed. Works the hybrid-to-cloud transition directly. Extensive experience working with a range of SI partners and consultants. Hands-on technical fluency across cloud architecture, APIs and AI workflows.

CORE COMPETENCIES

- **Higher education:** National coverage experience across universities, TAFE and K-12 systems
- **Self-generated pipeline:** Repeatable methodology for opening markets with no installed base: relationship mapping, convening buying communities, pre-tender requirement shaping, partner-led coverage.
- **Hybrid-to-cloud transition:** On-premise legacy estates and migration drivers in the sector; joint pursuit with hyperscaler field teams; security, sovereignty and IRAP accreditation as evaluation criteria.
- **Enterprise deal craft:** Multi-threaded engagement across Vice-Chancellors, CIOs, Chief Digital Officers and procurement; negotiating pricing and commercial terms on value and ROI; forecast accuracy across long, multi-stage cycles.
- **University procurement:** RFP and RFT response and pre-tender influence, probity, panel arrangements, ICT and Master ICT Agreements, security and privacy assessment.
- **Technical fluency:** Cloud architecture, API orchestration, CLI prototyping, AI workflow governance; translating technical architecture into business value for technical and executive audiences.

EXPERIENCE

monō ai | GTM Lead, Education & Social Enterprises

April 2026 – present

- **Pipeline from zero:** Built and executed a national territory plan across ANZ higher education and public-benefit accounts with no existing installed base, closing early enterprise deals on a path to \$1M USD ARR within twelve months.
- **Executive access:** Reached the president of Western Governors University (300,000+ students) directly, progressing to CIO and CTO on a student retention deployment now in negotiation.
- **Partner-led coverage:** Working with a partner to solve use cases at UTS shared across the sector and with an external architecture consultant shaping UNSW's future state.
- **Technical value proof:** Engineered CLI-based, clickable prototypes in place of static architecture slides, demonstrating live application behaviour, API orchestration and workflow visibility to technical decision-makers.

Salesforce | Account Executive, Enterprise Education

February 2024 – April 2026

- **Higher education portfolio:** UNSW, UTS and University of New England alongside TAFE NSW, the largest ANZ Catholic diocese and state-wide K-12 systems across the east coast.
- **New logo performance:** 94% attainment in a newly expanded territory, 200%+ against multi-year targets, 140% new logo attainment.
- **Winning against an incumbent:** Won an early tender at University of New England for their AI lab against an entrenched Microsoft footprint; built and sustained the Vice-Chancellor relationship, the only AE on the ANZ team to do so.
- **Hybrid-to-cloud pursuit:** Partnered with the AWS field team on TAFE NSW's exit from on-premise infrastructure at Villawood, aligning platform value to the migration business case under NSW Government cloud-first direction.
- **National coverage under pressure:** Covered the entire Australian education territory when the team turned over, identifying and closing a \$200K expansion at QUT inside a compressed window by trading capability the customer needed against seats and licences we wanted.
- **Market building:** Established a Salesforce partnership with the HEDx higher education platform, described internally as the strongest education partnership the team had held; selected to represent the ANZ education team at Salesforce's Education Summit in Chicago.

Salesforce | **Account Executive, Mid-Market Education**

June 2021 – February 2024

- **Built a market with no installed base:** K-12 buying in ANZ was organised around student information systems, which Salesforce did not offer. Convened independent and Catholic school groups with the Association of Independent Schools NSW into a recurring forum, brought in a partner who built the missing layer, and the resulting tenders were written around that architecture — generating \$3M+ pipeline, \$700K ACV and \$2M TCV, with deals still closing four and five years on.
- **Deal range:** Transactional through transformational deals, including land use cases from \$50k to above \$250K ACV and \$750K-\$1mil TCV
- **Reference customer:** Closed Christian Education Ministries, which expanded across Education Cloud, Slack, Data Cloud, Agentforce and Marketing Cloud over 17 schools to become Salesforce's leading K-12 education reference customer, and a direct influence on subsequent Catholic and Anglican school system tenders.
- **Sustained attainment:** 100% median quota attainment across five years against a team median below 50%, exceeding multi-year targets three times with consecutive years above 200%, in a territory where no AE had previously cleared 50%.

EARLIER LEADERSHIP & INSTITUTIONAL EXPERIENCE

Lead Australia Account Executive (Academic Advisor) | Crimson Education | Aug 2020 – Mar 2021

Director of Student Development & Wellbeing | Knox Grammar School, Wahroonga Preparatory Campus | Jan 2020 – Jan 2021

Head of Positive Education | Knox Grammar School | Jan 2016 – Dec 2019
